

## Concrete Flowers of Nurope A Bouquet of Networking, Mapping, Evaluating and Creating/Cooperating

Case story  
Lieven Paelinck / Julie Harboe

The Nurope network is at work. In the past months we have collaborated on defining and giving some specific impulses into the new MFA Programme – Master of Art in Public Spheres / Master of Art Teaching – starting this Autumn at the Lucerne University of Applied Sciences and Arts, Faculty of Art.

We will tell you the story and with your input lay out some of the key issues connected to the Nurope method:

### **Basis: People & Places:**

How does the networking function, what were the decisive inputs. How does one define the importance of „place“, the European context?

### **Activity:**

Discussing/Negotiating/Mentoring/Feedback

### **Themes:**

The leading themes of Nurope; social responsibility, sustainability, ethics, curiosity, generosity (all closely linked with the basis and the activity) are central to the work.

### **Conclusions:**

We will focus on the potential of the Nurope method; and in making a presentation about the Nurope method - we are also defining, or trying to make it even more concrete.
